

DATCP issues recall for pasties produced by Grammy's Pasty's

Class I Recall (see explanation below)

Release Date: April 8, 2016

Media Contacts: [Raechelle Cline](#), 608-224-5005
[Bill Cosh](#), Communications Director, 608-224-5020

MADISON, Wisconsin –The Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP)—Division of Food Safety along with Grammy's Pasty's, a Green Bay, Wisconsin establishment, is issuing a statewide recall for an undetermined amount of pasties that were not properly inspected prior to sale. The affected products have the Julian date of 88-16, 81-16, 74-16, 60-16, and 54-16 on the label or on the package.

This recall is initiated based on evidence collected during a routine inspection conducted by state inspectors at this establishment. Evidence shows that the firm's breakfast pasties, chorizo pasties and traditional pasties were not produced with the benefit of inspection by state officials as required by law for meat products.

All three varieties of pasties were sold at retail stores as well as wholesaled by distributors throughout the state prior to March 29, 2016. The establishment has voluntarily recalled the product and is working with DATCP to collect as much product as possible. All retail products were packaged individually in a clear plastic bag with the product label on the front of the package, nutritional information and Julian date on the back. Wholesale product is packaged individually as well with 20 pasties to a box that has a product label and Julian date on the box.

No illnesses have been reported as a result of consuming these products. Anyone with signs or symptoms of foodborne illness should contact a physician.

Consumers who have any of these products can return them to the original place of purchase or discard them. Consumers and media with questions about this recall can contact Eric Gullstrand at 920-217-6978.

USDA Recall Classifications

Class I	This is a health hazard situation where there is a reasonable probability that the use of the product will cause serious, adverse health consequences or death.
Class II	This is a health hazard situation where there is a remote probability of adverse health consequences from the use of the product.
Class III	This is a situation where the use of the product will not cause adverse health consequences.
